\*MARKET DEPENDENT

### Free-Range & Grass-Fed

All of our Beef, Lamb & Venison is sourced from pasture raised and free-ranging cattle, sheep, and deer.

New Zealand Lamb is world renowned with a distinct flavour and texture.

Beef is a great source of absorbable iron, and also hosts an abundance of other nutrients beneficial to health such as zinc and selenium.

Venison is a premium hypoallergenic choice - low in fat and high in protein.

93% Meat & Organs, with Green-Lipped Mussels & Salmon Oil

### Free-Run Chicken & Duck

Our birds are raised in modern, well-equipped barns. They are GMO free, just like our other ingredients and are free from added hormones which has been law in New Zealand for over 30 years.

Chicken is a favourite of many cats & dogs - high in protein, low in fat.

### Sustainable Seafoods

Our Salmon & Hoki Fish have been sustainably sourced from New Zealand waters.

Hoki is sourced from the deep blue oceans around New Zealand, while Salmon is sustainably farmed in the picturesque Marlborough Sound.

They both boast high levels of omega 3 which helps to improve the skin and coat of your pet while providing them with the nutrition that they need.

ZEALANDIA IS NAMED AFTER THE 8TH CONTINENT OF THE WORLD, WHICH ENCOMPASSES NEW ZEALAND & ITS SURROUNDING OCEANS

### Quality Ingredient Base

All of our formulas include a base of Superfoods from the Sea: Fresh New Zealand Green-Lipped Mussels, and Salmon Oil, with five Lamb Organs for a powerhouse of diverse nutrients.

The Lamb Hearts provide a natural source of Coenzyme Q10, while the other organs offer an abundance of vitamins A, Bs, D, E & K + more.

The Green-Lipped Mussels & Salmon Oil provide ETA, DPA & DHA fatty acids, to support skin & coat health.

### Wild Proteins

Our Brushtail & Goat is from the deep forests across New Zealand, where the Kangaroo is from the great western Australian outback.

Each protein offers a different profile of nutritional goodness, due to the different habitats and diet preferences of each species.

Kangaroo is extremely lean, and high in CLA (Conjugated Linoleic Acid) supporting heart-health. Brushtail is very high in Omega 3, and protein.

Our canned Deluxe Pate, is made in Sunny Gisborne

### Plant-Based Protein

Our Vegan Pate has been formulated as a complete and balanced diet for for all life-stages, recommended for feeding in rotation or supplementary to the other animal proteins.

Vegan Pate can also be fed solely as an elimination diet for a limited time, and fed in conjunction with a BARF diet. All vegetables, fruits, oils, and herbs are grown in New Zealand.
